

FOR IMMEDIATE RELEASE

Hughes Brazil Signs Video Distribution Services Contract with Elemídia Empresas

Leading Digital Media Provider Chooses Hughes Managed Services For Distributing Corporate Video Content

Germantown, Md., USA, 15 December 2010—Hughes Network Systems, LLC (HUGHES), the global leader in broadband satellite networks and services, today announced that its Brazilian operating unit, Hughes Brazil, has signed a managed services contract with Elemídia Empresas, the leader in the Brazilian out-of-home digital media market, to deliver corporate video content to Elemídia’s customers utilizing the Hughes nationwide broadband satellite network.

Elemídia Empresas specializes in planning, deployment, and operation of corporate digital TV channels, a powerful media vehicle that accelerates the distribution of information, enhancing capabilities for corporate leaders to communicate business culture and strategies. Today, Elemidia operates and produces content for more than 60 corporate TV channels, reaching an audience of approximately 300,000. Elemídia turned to Hughes for a new way to transmit content because an increasing number of its customers were located in regions of Brazil with poor networking infrastructure.

“Some of our customers are located in areas that cannot be reached by traditional landline services,” said Elemídia president, Pedro Gabriel Forjaz. “In addition, factors such as increased network availability, higher quality of transmission, national coverage, and the possibility of live transmissions influenced our decision to look into broadband satellite distribution. Hughes Brazil is a company focused on the corporate market, and worked with us as a partner in enabling the project.”

“The pilot tests with Elemídia were decisive in winning this deal,” according to marketing director of Hughes Brazil, Rafael Guimarães. “We were able to demonstrate that our comprehensive solution would meet all of their requirements, which included the capability to multicast large digital files with audiovisual content at a very high speed, enabling large operational gains for Elemidia.”

“Elemídia has plans to expand outside Brazil, so we need to rely on partners with global operations, allowing us to provide our services to customers anywhere in the world,” added Forjaz.
