Hughes to Address MILCOM 2011

Company Executive will discuss Resilient Commercial Satellite Architectures

Germantown, Md., November 1, 2011—Hughes Network Systems, LLC (Hughes), the global leader in broadband satellite solutions and services, today announced that Dr. Rajeev Gopal, a senior director in its Defense and Intelligence Systems Division, will participate on a panel entitled “Defining Resilient Architectures” at MILCOM 2011.

WHO: Dr. Rajeev Gopal, senior director, Defense and Intelligence Systems Division, Hughes

WHAT: MILCOM 2011

WHEN: Thursday, November 10, 2011, 10:30am – 12:00pm EST

WHERE: Baltimore Convention Center, Baltimore, Maryland

Dr. Gopal will join other government and industry leaders to discuss how resilience is defined and how resilient architectures can be provided through commercial satellite communications (COMSATCOM) capabilities, as well as what the implications are for systems. The panel will also address spatial diversity, control authority, network access, situational awareness and anti-jamming measures.

Hughes will showcase some of its technologies for the defense and intelligence communities at MILCOM 2011 in Booth 647, including the ruggedized HX280 communications-on-the-move (COTM) terminal, and newly released 9202 portable Broadband Global Area Network (BGAN) terminal. Additional on-site technologies will include satellite solutions with enhanced security options, including Federal Information Processing Standards (FIPS) 140-2, Security Level 2 certification, and those undergoing Wideband Global SATCOM (WGS) certification.

Press Registration
Members of the media interested in scheduling a briefing with a Hughes executive are invited to contact Kristin Graybill at: (571) 323-2585, ext. 2190, or by email Kristin@connellyworks.com. For more information on MILCOM 2011, visit http://www.milcom.org/index.html.
