

HS950 Digital Signage Player

With the Hughes HS950 digital signage player, getting up and running on world-class digital signage is now more affordable than ever before.

The Hughes HS950 is an advanced, Windows-based, wireless-enabled digital media and menu board player designed to provide HD video and image playback to a single screen. Offering full 1080p HD playback, the HS950 is capable of storing 6–8 hours of HD video. Further, the player can be configured to play in remote locations with a wide range of menu board styles, content and layouts.

Hughes and Scala™ have collaborated and created a reliable solution built on a proven hardware platform. Arriving as an out-of-the-box, ready-to-install appliance, the HS950 software (installed predelivery) provides stable multimedia playback for any market. Utilizing a simple setup wizard, the customer connects the player to their preferred network and then the Scala Content Manager. Once connected, the player receives the necessary content and information to assume the desired playback role. Multiple players can run on a single network, and players can be moved from location to location as desired.

The Hughes HS950 digital signage player supports a large array of designs – providing the ability to display vivid and engaging menus, play video, still images, and scrolling data feeds like RSS news and location-specific information. The HS950 is designed for 24/7/365 reliability and will continue to play assigned content even if the network connection becomes disabled.

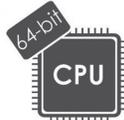

Full 1080p HD
Video Playback

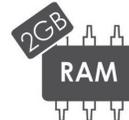

Windows 8.1

Single-Band Wi-Fi
802.11n

Intel Z3735F (64-bit)

2 GB DDR3L

32GB eMMC (5.0)

Specifications

Processor: Intel Z3735F (64-bit)

GPU: Intel HD Graphics

Memory: 2 GB DDR3

Internal storage: 32 GB eMMC
