

# Hughes 4510 S-band Terminal

Date: **July 21, 2021**  
Release: **5.4.1.3**  
Importance: **Mandatory**

Software version 5.4.1.3 for the Hughes 4510 terminal is a mandatory upgrade with a bug fix for remote SW upgrade.

The file name of the new SW release package for upgrade through the WebUI is **hughes\_4510\_5.4.1.3.hif**.  
Alternatively, the SW can be installed in boot mode with the SW Uploader package **4510\_Uploader\_5.4.1.3.zip**.

## Updates in 5.4.1.3 (since 5.4.1.1)

- Fixed a bug that prevented SW upgrade from remote server when no user connections are active.

## Known Issues:

- The terminal will accept IP address requests from connected TEs if they are valid and non-conflicting IP addresses on the subnet, even though they are outside of the specified DHCP range. This is per design of the DHCP server implementation.
