

Hughes Fixed Wireless by 2pifi

Reliable Connectivity for hard to reach remote locations

The Fixed Wireless solution is a Line-of-Sight (LOS)-based microwave solution, which can provide sites with high-speed links when alternatives are unavailable, has been added to the Hughes portfolio as an alternative when wireline/wireless services aren't available or require extensive construction. Additionally, it is available for configurations where the footprint extends outside of CONUS, providing a solution for many hard to reach locations not available through our standard Wireline services. Hughes has partnered with 2pifi, a fixed wireless aggregator to offer these services.

Network Architecture

- Deploying a microwave network is less expensive than digging under existing construction.
- Point to Point connectivity extends WAN connectivity quickly and efficiently
- High-speed connectivity makes remote access to education and business applications possible

HughesON™

HughesON is a suite of innovative, Cloud-ready network and digital media solutions designed for the unique needs of distributed enterprises in industries such as retail, hospitality, and retail petroleum.

Hughes Fixed Wireless by 2pifi

The Hughes service is turnkey and provides an up and running service with optional throughput packages that range from 3 Mbps x 1 Mbps up to speeds of 20 Mbps x 5 Mbps.

Typical antenna installations for fixed wireless microwave include roof or wall mounts and can be fixed or non-penetrating.

Coverage

The service has coverage in all 50 US States, Puerto Rico, USVI, and parts of Canada. Line-of-Site prequalification may be required in certain areas.

Current Service Offerings

- 3M x 1M
- 5M x 2M
- 10M x 2M
- 15M x 3M
- 20M x 5M
