

# Secure Your Business with Hughes Managed SASE

The Global SASE Market is expected to grow from 1.9 billion in 2023 to

**5.9 billion** in 2028.

Secure Access Service Edge (SASE) is growing rapidly due to its ease of use and high-level protection it provides.

**80%** of US IT security decision-makers plan to increase cloud security spending in the next 12 months.<sup>1</sup>

**75%** of US IT security decision-makers plan to increase spending on upgrades to existing on-premises security technology.<sup>1</sup>

With how fast technology has been improving (think AI and Machine Learning), your old security software and solutions have likely already become deficient.

By 2025, **50%** of new SD-WAN purchases will be part of a single vendor SASE offering, up from 10% in 2022.<sup>2</sup>

SD-WAN is the network infrastructure SASE requires to run smoothly and efficiently thanks to intelligent routing and the ability to prioritize traffic for optimal performance.

By the end of 2023, [...] nearly 70% [of businesses] plan to have SASE.<sup>3</sup>

Being a late adopter of the most recent security technology could make you a more desirable target for cybercriminals.

**75%** of organizations are pursuing security vendor consolidation, up from 29% in 2020.<sup>3</sup>

SASE combines a number of services into a single vendor, such as Cloud Access Security Broker, Secure Web Gateways, Zero Trust Network Access, Firewalls, and SD-WAN.
