

Date: **21 February 2024**
Product: **Hughes 9502**
Release: **5.9.6.7**
Importance: **Recommended**

Software version 5.9.6.7 for the Hughes 9502 terminal is a recommended upgrade with a few enhancements.

The 5.9.6.7 upgrader will be available through both the Inmarsat support page:
www.inmarsat.com/support/bgan-firmware/
and the Hughes BGAN support page:
bgan.hughes.com

Alternatively, the software can be downloaded over the air from the Inmarsat upgrade server by using the Remote SMS feature and the ATCO command `_IGETFW`.

Release Notes for 5.9.6.7 (Since 5.9.6.6)

Enhancements

- Update the default satellite constellation information to include IOE and remove MEAS.
- The new release corrects the date when the GPS week rolls over. The date in the GPS system rolls over every 1024 weeks, which causes the GPS chip to report the wrong date when it is 19.7 years old, preventing the UT from registering on the BGAN system.
