

Benefits of Hughes Managed LEO

Powered by OneWeb

For latency-sensitive applications and service in previously unconnected areas, Hughes Managed LEO leverages Eutelsat's global OneWeb LEO satellite network to provide reliable, high-speed, low-latency connectivity.

Guaranteed Service Level Agreements

Managed service delivery includes 24x7 monitoring and dedicated help desk support.

Security

Our cybersecurity solutions for distributed enterprises can be layered on top to protect your network.

Low Latency

Because LEO satellites are close to Earth, they produce stronger signals with faster response times, delivering continuous connectivity.

Flexibility

With access to more than 850 Network Access Providers of all types, Hughes can deliver high-performance network connections wherever you do business.

Dedicated Capacity

Unlike other offerings, our capacity is 100% dedicated to enterprise services – no sharing with consumer apps and users.

One-stop Simplicity

Hughes is your one stop for LEO service, offering everything necessary for a managed LEO deployment.
